- Low-Density Lipoprotein (LDL): 100
- Blood Pressure: 118/76 (normal levels)
- Heart Rate: 74 (normal levels, bradycardic)

Remarks: All vital parameters appear within normal range. No signs of infection or abnormal glucose levels. Lipid profile indicates balanced cholesterol, and it is recommended that the patient continues regular checkups every 6 months.

Patient Summary

Hi Ananya,

Here's your health report from Sunrise Diagnostic Center on July 14, 2025. Dr. R. Verma checked you up. Your hemoglobin level is at 13.2, which is within the normal range. All other blood cell counts are also normal. Your glucose levels were good, and there was no sign of infection.

Your lipid profile shows a balanced cholesterol level, but your triglycerides are a bit high at 150. Dr. Verma recommends that you continue regular checkups every six months to keep an eye on this. Your blood pressure is also normal at 118/76, and your heart rate is 74 beats per minute.

Overall, everything looks good, but remember to keep up with those appointments! Stay healthy, Ananya!
